

ANCO 1045 PRE-BREAKER

- With a 125HP low RPM motor and a 38 1/2" (L) opening the 1045 can handle whole carcasses with out pre-cutting.
- Outboard pillow-block bearing design to reduce shaft deflection, jamming and reduce the wear on the hammer and anvil section.
- Easy removal of hammers for service and replacement.
- Replaced "Svaertek" at National Beef with a 80k lb/hr unit.
